What to do first

Start with the first applicable item in the repair plan.

Page 1 | 3 findings

https://example.org/

Repair plan

3 distinct repair tasks. The first 3 are shown below. See page findings for evidence and retest steps.

1. Medium | Page 1

Add a visible main heading.

2. Medium | Page 1

Write a page-specific description.

3. Medium | Page 1

Review which URL should be canonical.

Coverage

Checks used the HTML received or uploaded. Response headers are listed for fetched pages. When available, response timing is from a single HTML request. If shown, linked-page statuses cover a sample of up to three same-origin destinations. Rendered layout, Core Web Vitals, and full accessibility require separate testing.

Fix verification

Sandbox | 2026-11-13

Baseline and retest

2026-11-12 to 2026-11-13
Fixed means the same automated check could confirm a change. Unavailable checks are marked Couldn’t verify.

Results

Fixed 1 | Still open 0 | Newly detected 3 | Couldn’t verify 0
